

Zoek en bedek

Zoek en bedek 

uitleg

Ga met een zaklamp tellen hoeveel stippen het lieveheersbeestje heeft. Hoeveel heb je er geteld? Bedek hetzelfde getal als het aantal stippen dat je hebt geteld.

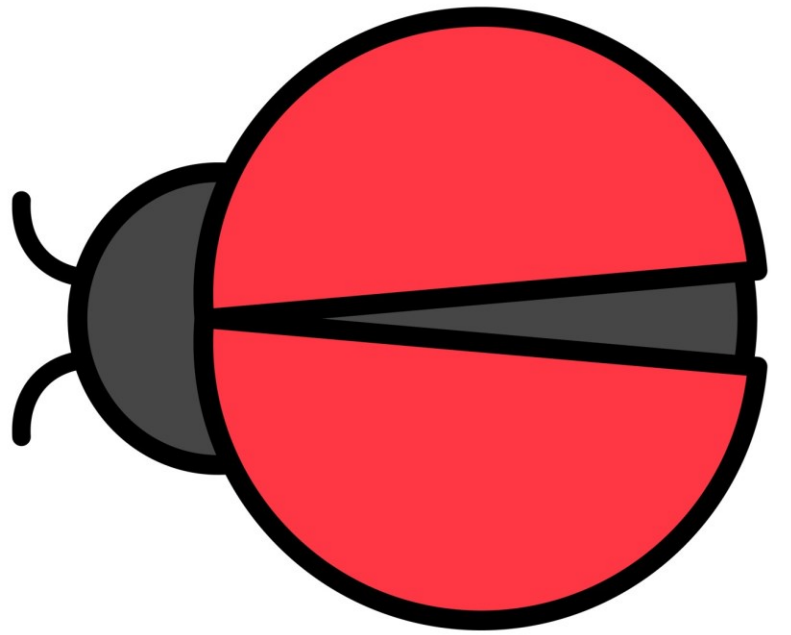

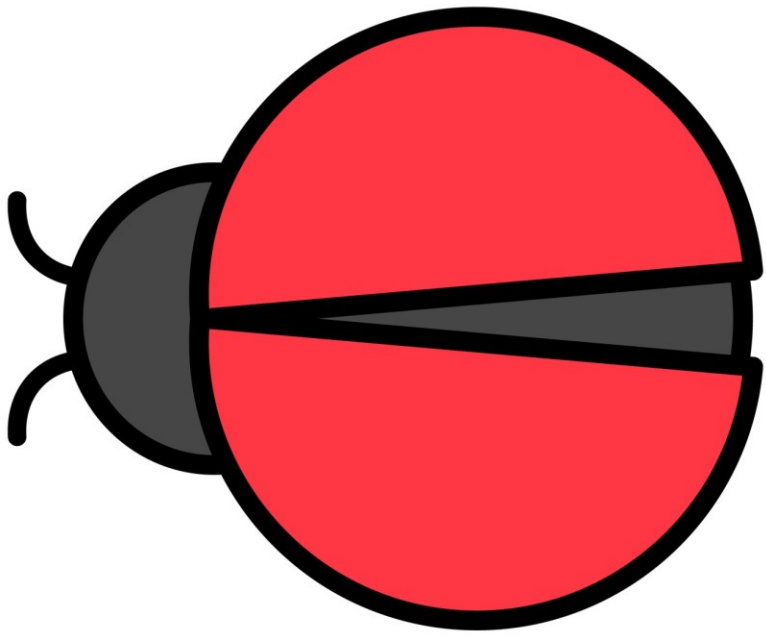

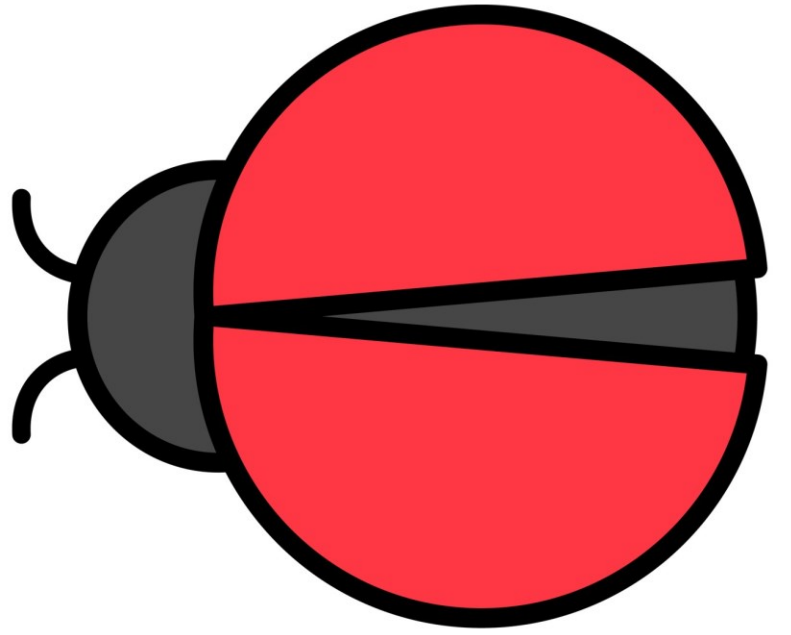

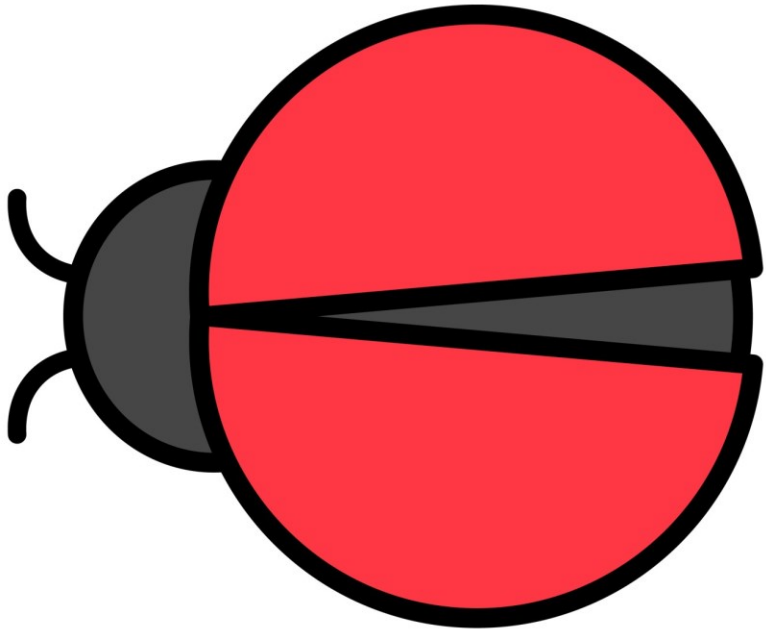

Je kunt het getal ook bedekken met kleine pom poms. Door de kinderen met een grijper de pom poms te pakken oefenen ze ook hun fijne motoriek.

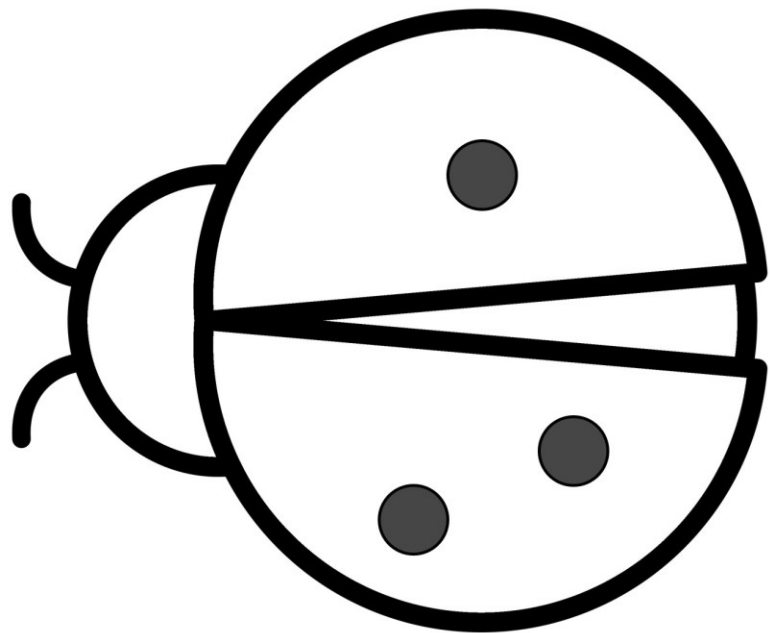

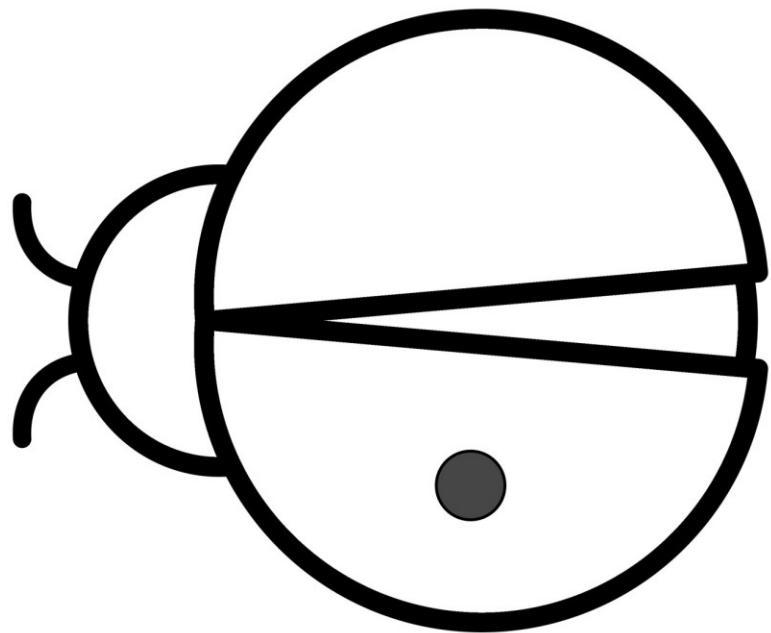

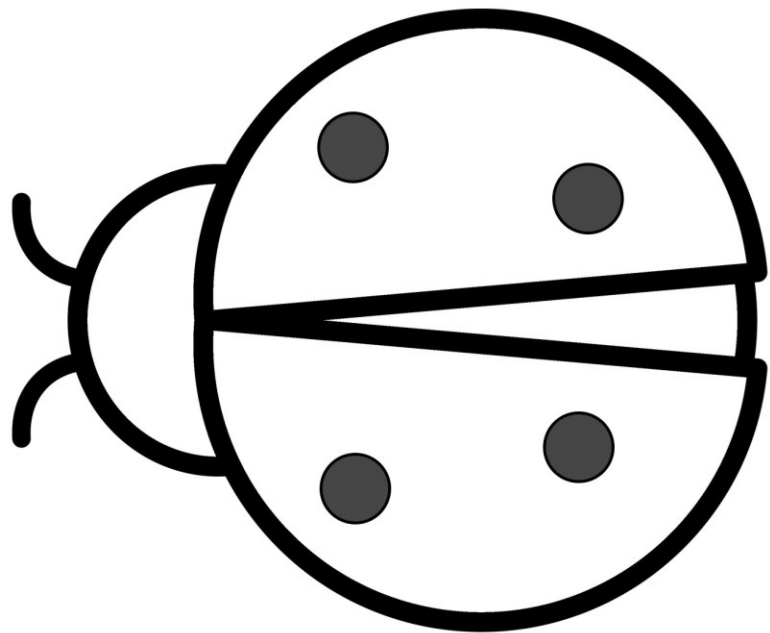

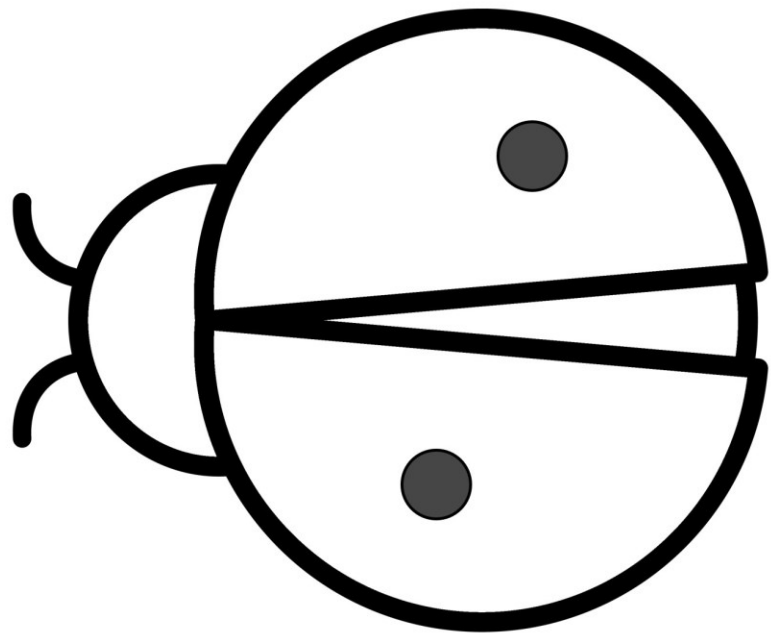

Doordat het lastig is voor jonge kinderen om zowel met een zaklamp te schijnen en het overzicht te houden van het aantal getelde stippen, heb ik er zelf voor gekozen om het spel aan te bieden op een lichttafel. Zo kunnen de kinderen steeds een lieveheersbeestje op de lichttafel leggen en het aantal stippen tellen.
